

## Statewide Water Analysis Network Activities September 2013

### **Webinar on 9/11/2013 - Evaluating Resources Management Strategies for the Central Valley**

– The goals of this meeting and webinar are to 1) Interactively review results from a water management vulnerability assessment conducted for the Sacramento River, San Joaquin River, and Tulare Lake Hydrologic Regions and how vulnerabilities can be reduced by implementing alternative water management strategies, and 2) Seek feedback on presenting analysis in the Water Plan Update 2013, discuss limitations, and provide advice for presenting to the Public Advisory Committee. This is your chance to provide input on key technical results to be published in Update 2013. Agenda and meeting materials are available here:

**Regional Forums** - The next round of regional forums are scheduled to begin September 11, 2013 in Indio, CA, for the Colorado River hydrologic region. These region-specific forums are held across California and run into early October. The forums provide an overview of the Water Plan's public review draft and will include information on submitting comments.

**Water Plan Plenary Session set for October 29th and 30th** – This two day meeting is one of the last opportunities for all the Water Plan advisory groups to gather and provide feedback on the key messages and results for Update 2013 before the final is published. Specific topics will include Water Management under Future Uncertainties, Water Sustainability Indicators, Groundwater Management, Climate change and much, much more! You can view the agenda here:

**Final Draft Conferences Paper from 2013 EWRI Conference Posted** – Three final draft papers to emerge from the 2013 Environmental and Water Resources Institute (EWRI) conference have been posted on the Water Plan's website. They cover evaluating the resource management strategies of the Water Plan, promoting water resources sustainability through innovative strategies, and indicators to measure water sustainability.
